Aishwarya Kanani

Brampton, Ontario | (382) 880-0595 | kanania@uwindsor.ca | LinkedIn

Professional Summary

Results-driven Data Analyst and BI Developer with 3+ years of experience building dashboards, data models, and analytics solutions that drive measurable business outcomes. Hands-on expertise across the full analytics lifecycle — from SQL-based data extraction and ETL consumption to Power BI report development and cloud reporting on GCP. Currently at TELUS, delivering reporting solutions using BigQuery, Looker, Domo, and Gemini AI. Equally comfortable owning a BI dashboard end-to-end or collaborating with data engineering teams to deliver clean, reliable data. Targeting roles in **BI Analysis, Data Analysis, or Junior Data Engineering**.

Technical Skills

Cloud & Analytics Platforms: Google Cloud Platform (GCP), BigQuery, Looker, Domo, Gemini AI, Power BI Service

BI & Visualization: Power BI (DAX, Power Query, RLS, Custom Visuals, Star Schema), Looker, Domo, Excel (Pivot Tables, VLOOKUP/XLOOKUP, VBA, Macros, Power Pivot)

Data & Query: SQL (BigQuery, MySQL, SQL Server), Python (Automation, Data Manipulation), M Language (Power Query), ETL/ELT, Data Modeling, Data Quality

Dev Tools: VS Code, GitHub, SharePoint, DAX Studio, Databricks

Domain Expertise: Business Intelligence, Data Reporting, Stakeholder Management, Data Governance, Dashboard Design

Professional Experience

Data Analyst March 2026 – Present

TELUS *Toronto, ON*

- Build analytics and reporting solutions on **GCP** using **BigQuery**, **Looker**, and **Domo** to support customer activation, planning, and retention strategies for small business segments.
- Led the end-to-end build of a **customer call center analytics solution** — ingesting and transforming data from **Genesys Cloud** via **Pulumi**-based ETL pipelines — delivering operational insights on call volumes, agent performance, and customer experience trends to leadership.
- Write and optimize complex **SQL** queries in BigQuery to extract, clean, and surface data powering marketing and sales enablement tools.
- Collaborate with data engineering teams to consume and validate **ETL pipelines**, ensuring data quality and reliability for downstream reporting.
- Leverage **Gemini AI** with BigQuery and GitHub MCPs to accelerate insight generation and deliver data-driven recommendations to marketing and data leadership.

Data Consultant October 2024 – March 2026

RPA Unicorn *India (Remote)*

- Designed and deployed interactive **Power BI dashboards** across multiple departments, enabling self-serve reporting and significantly reducing reliance on manual data requests.
- Built and maintained **star-schema data models** with optimized **DAX measures**, improving report load performance and reducing model size for faster, more reliable analytics.
- Ingested and transformed large volumes of data from diverse sources (Excel, SQL, SharePoint, CSV) using **Power Query**, streamlining data preparation and cutting processing time.
- Collaborated with business stakeholders to translate requirements into KPIs and custom visuals; used **Databricks** for large-scale data exploration and ad-hoc validation feeding into reporting layers.

Data Entry Operator June 2024 – September 2024

Central Transport *Windsor, ON*

- Maintained accurate daily records of logistics and customer data in **Excel**, applying systematic quality checks to identify and reduce data discrepancies.
- Prepared regular management reports and maintained large customer record sets, supporting audit readiness and operational reporting cycles.

Data Quality Analyst January 2022 – December 2023

RPA Unicorn *India*

- Monitored daily customer transaction data for anomalous patterns, escalating findings through structured review workflows with a strong focus on accuracy and consistency.
- Developed **Excel**-based reporting templates to standardize data quality tracking; worked with cross-functional teams to define data standards and validate source-to-report consistency.
- Conducted sales analysis across multiple product categories, identifying trends that supported conversion rate improvements and collaborated with product managers on listing optimization.
- Refined transaction monitoring rule logic to reduce false-positive alerts, improving the overall signal quality of underlying analytics models.

Key Projects

Banking Analytics Dashboard | *Power BI, DAX, Data Modeling*

- Built an interactive Power BI dashboard analyzing **4,000 banking customers across 5 cities** — covering demographics, income, spend trends, and payment behavior — to identify high-value segments and inform a new credit card product launch.

Business Insight 360 – Brick & Mortar and E-Commerce | *Power BI, MySQL, Excel, DAX Studio*

- Designed a multi-view Power BI dashboard on **1M+ records** from MySQL and Excel using a star schema; delivered **30+ DAX measures** and optimized report performance by **25%** via DAX Studio, projecting **$2M+ revenue growth** and cost savings .

Education

University of Windsor Windsor, ON

Master of Engineering – Electrical and Computer Engineering *Apr 2024 – Aug 2025*

Gujarat Technological University Gujarat, India

Bachelor of Engineering – Electronics & Communication *Jun 2013 – May 2016*

Certifications

Data Analytics & BI Certification – Codebasics (Power BI, SQL, Excel, Python) *2024*

Google Cybersecurity Professional Certificate *2024*
